

Compound for PVC Based Cable Applications

ST-2
ST-4
ST-5 ...
and others

Our PVC-based cable compounds are developed according to the requirements of existing standards (CEI-227/60-502) or according to customer demands.

Quality control covers the entire process from production to delivery. Our products are easy to handle, high strength and high heat resistance. They offer excellent process comfort.

The finished product has a flawless surface and color.

Packaging: 25 kg bag or double-layer PE+PP bigbag, (at 2000 kg)
